Opus Expands For-Hire Vehicle Inspection Program in New York

Opus Prodox AB (publ) today announces that its wholly-owned subsidiary SysTech International LLC, has expanded the For-Hire inspection program in New York City to include testing of all For-Hire Vehicles in addition to testing medal-lion taxis. Approximately 40,000 limousines will be affected by the expanded program thus significantly increasing the number of vehicles inspected at the New York City Taxi and Limousine Commission (NYCTLC) Woodside inspection facility. NYCTLC awarded a contract amendment to SysTech in November 2009 that includes an upgrade to the SysTech inspection software application and added service and maintenance responsibilities. SysTech designed and installed the NYCTLC Safety and Emissions Inspection Lane system in 2004 and has maintained and enhanced it since.

"We are grateful that the New York City Taxi and Limousine Commission continues to have confidence in SysTech's for-hire vehicle inspection system", says Lothar Geilen, CEO of SysTech. "This contract amendment is evidence of the exemplary business relationship we have maintained with NYCTLC. We remain fully committed to supporting the advanced technology SysTech developed for the City and ensuring continued uninterrupted service to the NYCTLC inspection facility."

The contract amendment is valued at USD 700,000 over a two year period and is in addition to the existing contract SysTech has with the NYCTLC.
